9. Validating course contents based on the expectations of epistemic communities, professional associations and of potential employers related to the field of study.

International and European language policies seek to address the growing needs of a labor and a scientifically internationalized research market, and as such, foreign languages for academic and specific purposes are represented throughout many university centers

- in the country (in vocational fields such as business, law, medicine, computer science, tourism, but also in the courses which make use of the scientific discourse in various fields – chemistry, physics, education sciences, social and communication sciences etc.). For reference, see the specific departments and the foreign language centers in Bucharest, Timișoara, Iași, Tîrgu-Mureș, Alba Iulia, Oradea etc.
- abroad (particularly regarding the academic learning competences and socio-professional communication), where all universities have centres that specialize in practical areas of the specialized discourse, playing an essential role in creating an instructional and academic culture. For instance, universities such as: Harvard, Washington, North Carolina, Southampton, Darmouth, Essex, Leeds, Graz, Central European University, etc.

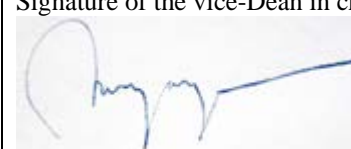

The content of the teaching activity can develop those skills and competences that are specific to academic learning and

research activities, in the context of higher education internationalization.
